iWorK - its Electric

iWorK is the first of a new generation of personal ATV. Its 100% electric and its very quiet - in fact its almost silent - and that makes it golden ...

iWorK's whispering allows riders can communicate easily with those in their vicinity. iWorK genuinely puts riders in command, their senses are sharp enabling maximum efficiency and productivity.

Whispering iWorK can be used around hotels, golf courses, sports centres, offices, conference centres, schools and colleges, even inside buildings, without disturbing the environment of those at work or play with noise or pollution. Likewise, iWorK's impact on animals both wild and managed is minimised. iWorK ensures tranquil scenes remain tranquil while the work gets done.

In addition there are substantial benefits of pure electrical power. No petrol or petrol cans means safer operation, minimal daily running costs and facilitates use indoors while the lack of oil and filters keeps servicing costs down.

However, iWorK isn't just an advanced vehicle - iWorK also communicates a powerful message. iWorK says, "we have got our finger on the pulse - we understand the harm noise and pollution have on people, wildlife and the environment". iWorK says, "we are progressive and responsible".

Verteci iWorK - A Silent Revolution

iWorK - Specification

- 4Kw electric motor for rapid acceleration
- 72 Volt system (6x12 Volt) for reassuring power
- 6 Maintenance free batteries each 75Ah
- Onboard charger (full charge approx 9 hours)
- 40Km/h approx maximum speed
- 30 to 40 Kilometre range
